IN HIS STEPS
INTERNATIONAL

Equip a Generation

IN HIS STEPS' desire is to empower those in the Saang community. One way we can do that is to put technology paired with training in their hands.

This Fall, the Kairos Training Center will be complete. The KTC is a multi-purpose building that will provide endless opportunities to the surrounding community including computer training. This program will equip, empower and educate the community's children and young adults in computer skills. We also plan to provide classes to pastors in the IHSI Pastor's Fellowship, as well as teach IHSI's staff.

Currently, we have four stationary computers placed in Father's House which is not ideal and simply not enough to provide training to more kids. Our goal is to make this revamped program more comprehensive, including installing an instructor computer/server, six additional workstations and licensed software.

enable   empower

To make this a reality, we need your help. Please consider giving to this project.
