

BEST MIXED-USE VENUE 11 11 LINCOLN ROAD ▼ Miami Beach; designed by Herzog & de Meuron

More than a parking lot, 11 11 Lincoln Road is an open-air raw-concrete structure with, depending on which floor you happen to be on, seven- to 34-foot ceilings, as well as numerous hip retail shops and restaurants. Its developer, Robert Wennett, refers to the place as a "parking sculpture." He also built a one-block extension of the pedestrians-only Lincoln Road Mall designed by landscape architect Raymond Jungles and Herzog & de Meuron and installed a new piece of public art by Dan Graham called *Morris* in honor of the late Morris Lapidus, the much-maligned, much-loved architect we have to thank for such Miami Beach landmark hotels as the 1954 Fontainebleau and the 1956 Eden Roc. 305/538-9320; 1111lincolnroad.com.
