About the Central Coast
The Central Coast of California is one of the world’s most beautiful areas. San Luis Obispo County is home to many vistas, clean air, amazing beaches, world renowned wineries and daily farmer’s markets. Visit us for the course but consider extending your stay to experience some of the best that California has to offer. The Central Coast is a nice change of pace from other parts of CA you may be familiar with.

Faculty
Anne Buckley-Reen is a popular presenter, OT and yoga therapist who is known for her innovative treatment programs. Anne has practiced yoga therapy since 2000 and shares her powerful and life changing experiences in this exciting workshop. Her programs are taught throughout the U.S. and were recently introduced in Europe. She is sought after as a consultant for school districts and therapy programs and as a mentor to her peers. She is currently involved in a number of research projects utilizing therapeutic yoga.

**Course Description**

This dynamic 2 day program offers the school based practitioner a clinically researched Yoga curriculum utilizing developmentally graded yoga sequences which align with RTI and PBIS. Used throughout the US and England since 2008, this popular preparatory yoga curriculum addresses learning and behavior issues across ages (preschool through high school), stages and levels of ability. This program has been shown to positively impact sensory processing, self regulation, attention, communication, motor planning, and performance. Get Ready to Learn (“GRTL”) is designed for daily implementation and adaptation in the classroom to prepare students to be in optimal physical, emotional and cognitive states for learning.

Challenges addressed include students with mild to severe physical limitations, autism spectrum disorders, developmental and learning disabilities, and attention and emotional/self-regulatory issues.

**Course Objectives**

Following completion of this course, participants will:

1. Discuss the research evidence that supports the use of a comprehensive yoga program to address issues of communication, self regulation, attention, auditory processing and motor performance.

2. List the steps to design a collaborative approach to implement a yoga program within a classroom, which incorporates teacher and administration “buy-in”.

3. Identify and develop a sequence of integrated yoga postures for children with special needs to support relaxation, breath support, phonation, concentration and focus.

4. Identify and use 4 specific data collection tools to measure the effectiveness of the yoga program intervention.

**Participant Requirements**

Please wear comfortable clothing, suitable for movement. A yoga mat and light blanket is required for all attendees. For additional comfort, participants may want to bring a pillow for sitting on the floor.
