

BS4800 Colour Standard

Information from FLAG Website

Due to differences in display monitors and screen calibrations, the appearance of colours may vary from one computer to another. This table is an approximate guide only.

BS4800: Selection of colours from BS5252F to be used within paint. Total number of shades: approx. 100

Typical notation: 08B15 How to understand the notation:

08 indicate hue (groups from 00 to 24)

B indicate greyness group (groups from A to E)

15 saturation (groups from 01 to 58)

BS4800 is an important standard used within the paint & construction markets. Widely used by designers, architects and consultants for colour referencing.

SAFETY: Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Material Safety Data Sheets and follow all local or national safety regulations.
