# 5 REASONS

WHY TOP PROFESSIONALS CHOOSE

HearthCabinet™

## #1: ROARING FLAME

Our innovative fuel cartridges provide a unique, beautiful, real flame that dances like a wood fire but without the smoke or mess.

## #2: VENTLESS

HearthCabinet™ Ventless Fireplaces do not require a chimney, flue, gas line, or electricity, allowing you to put them virtually anywhere.

## #3: SAFE

Patented safety and design features unique to HearthCabinet™ Ventless Fireplaces ensure the safest fireplace experience possible. They are the ONLY ventless fireplaces approved for use in NYC.

## #4: CUSTOM-TAILORED

Every fireplace is handcrafted in NYC and can be completely custom-designed to project needs.

## #5: PERSONAL SERVICE & PROFESSIONAL EXPERTISE

Our staff of architects and designers will work directly with you on your project, start to finish.

## WHO WE ARE & WHAT WE DO

**HearthCabinet™ Ventless Fireplaces** is a world-class ventless fireplace brand that designs and manufactures the only ventless fireplaces that use the finest, safe, clean-burning, gel fuel cartridge system.

All of our models are designed by an architect-led design team and evolved from a solution for a client who wanted a safe and beautiful fireplace for a luxury high-rise apartment.

HearthCabinet™ Ventless Fireplaces have been used in high-end residential, hospitality, and commercial spaces across North America by top trade professionals.

HearthCabinet™ Ventless Fireplaces are the **ONLY** ventless fireplaces approved for use in New York City because of their unique safety features.

HearthCabinet™ Ventless Fireplaces are designed and handcrafted in New York City by NY craftsmen, ensuring high quality, bespoke products with short lead times.

HearthCabinet™ has been the leader in custom, luxury, ventless fireplaces since 2005.

*Available in Other Finishes*

## WIDESCREEN - VENTLESS FIREPLACE

Models #2010, #3030, #3040  
42" W x 28" H x 11.5" D

## HOW IT WORKS

Ventless... Vent-free... Unvented... However you want to say it – no venting of any kind is needed.

HearthCabinet™ Ventless Fireplaces' beautiful real flame comes from alcohol gel fuel cartridges. They are clean-burning, eco-friendly, and do not produce smoke.

**There is no need for a chimney, flue, gas line or electrical connection** – they are completely self-contained fireboxes. They simply slide into place and are secured with screws through the base of the firebox.

To light a fire, open the keyed locking door, place one or two cartridges inside the fireplace's cartridge holder, remove the cartridge cap and light the exposed gel with a long butane lighter, then close and relock the door to enjoy a vibrant fireplace experience.

Since there are no gas lines or chimneys to inspect, maintain or repair, replacing cartridges is all it takes to enjoy a HearthCabinet™ Ventless Fireplace for decades to come.

### **3-SIDED - SEE-THROUGH**

Shown in Powder Coated Steel  
Model #704 - Peninsula  
36" W x 24" H x 18" D  
*Available in Other Finishes,  
Landscape or Peninsula*

### **2-SIDED - SEE-THROUGH**

Models #701, #702  
42" W x 30" H x 18" D

## **GEL FUEL CARTRIDGE SYSTEM**

HearthCabinet's single-use, prefilled, alcohol gel fuel cartridges are a far cleaner alternative to wood or gas and a much safer alternative to pourable liquid fuels.

The cartridges create the same roaring flames as wood, and like logs, last up to 2 hours. Simply replace the cartridges as needed.

The fuel is a mixture of virgin isopropyl alcohol (like rubbing alcohol) and water, with a small amount of gelling thickener. It is similar to commonly used chafing fuels.

While not meant to serve as a primary heating source, HearthCabinet™ Ventless Fireplaces do give off a considerable amount of heat. Since no chimney or venting is required, all of the heat remains in the room.

Cartridges come in pine, vanilla, cinnamon or unscented. They are available in cases of 8, purchased online, and shipped anywhere in North America.

## PERFECT FOR ANY PROJECT

RESIDENTIAL - COMMERCIAL - HOSPITALITY

The comforting warm, flickering fire and crackling sound of a HearthCabinet™ Ventless Fireplace provides the perfect environment for entertaining and relaxing at home.

A welcoming fireplace is also an ideal way to greet visitors to restaurants, entertainment venues, retail stores, health care facilities, or businesses. Beautiful fireplaces are attention-grabbing focal points year-round.

HearthCabinet™ Ventless Fireplaces save valuable square footage in multi-story residential buildings and hotels because they do not require flues, and they save on construction costs.

Home owners, property owners, and real estate developers all benefit from Hearth Cabinet's unique safety and design features.

### LINEAR - VENTLESS FIREPLACE

(with Angled Tile Interior)  
Model #303  
36" W x 28" H x 11.5" D

*Available in Other Finishes*

## EASY INSTALLATION

Installing a conventional fireplace can often be either impossible or prohibitively expensive. Wood and gas fireplaces require venting and have expensive construction requirements. HearthCabinet™ Ventless Fireplaces can be installed virtually anywhere, indoors and outdoors.

HearthCabinet™ Ventless Fireplaces are completely self-contained and come fully assembled. Putting them into place is simple and only takes a matter of minutes. The unit is secured with just four screws through the base of the fireplace into a floor, subfloor or prepared base.

Whether designed to be free-standing or built into a surround or mantle, modern or traditional, HearthCabinet™ Ventless Fireplaces provide unparalleled flexibility for design professionals and homeowners.

## THE **ONLY** VENTLESS FIREPLACES APPROVED FOR USE IN NYC

HearthCabinet™ Ventless Fireplaces are the **ONLY** ventless fireplaces approved for use in New York City by the NYC Fire Department and Department of Buildings because of their safety features, ensuring a safe experience anywhere.

DOWNLOAD THE LETTERS ON  
**HEARTH Cabinet.COM**

## **UNIQUE SAFETY FEATURES**

### Patented features include:

- A top-hinged, locking front safety door with a rigid mesh screen to prevent unintentional access to the flame by adults and children.
- The alcohol gel fuel cartridges are single-use and pre-filled so no pouring is necessary.
- The internal cartridge holder safely and securely keeps the cartridge stationary and prevents tipping while the fire is burning.

HearthCabinet also has a line of products that are ETL listed/certified in compliance with **UL Subject 1370** (a UL standard related to unvented alcohol fuel burning decorative appliances).

The **ETL Listed Mark** demonstrates compliance to the requirements of widely accepted product safety standards, as determined through independent testing and periodic inspections.

## CUSTOM - VENTLESS FIREPLACE

Shown in Stainless Steel  
(with Angled Tile Interior)  
42" W x 36" H x 11.5" D

*Custom sizes, designs,  
and finishes are available.*

## CUSTOM DESIGNS

HearthCabinet™ Ventless Fireplaces come in a range of styles, sizes, and can be custom designed for any project from modern, to transitional, to traditional.

A variety of metals, colors, finishes and interior and exterior details are available to make a HearthCabinet™ Ventless Fireplace match any space or design.

## RETROFITS

Non-functional fireplaces don't have to stay that way. Simply inserting a HearthCabinet™ Ventless Fireplace into an existing fireplace or mantle is an elegant solution that eliminates the need for costly masonry work or flue inspection or repairs.

HearthCabinet™ Ventless Fireplaces can be custom-tailored to existing fireplace or mantel dimensions.

## MADE IN NEW YORK CITY

HearthCabinet™ Ventless Fireplaces are designed and handcrafted locally within the five boroughs of New York City. Highly skilled and precision-oriented HearthCabinet™ designers, technicians, and craftsmen are dedicated to quality.

Employing local professionals contributes to the local economy and also allows HearthCabinet™ to maintain the highest quality standards through every step of the design and fabrication process. This results in unparalleled quality and short turnaround times on all fireplace orders, standard or custom.

***“In NYC you have a lot of restrictions and it’s very difficult to put a fireplace in. This product has been able to overcome all of those obstacles,***

***which is one of the major reasons why we wanted it and have been using it in other projects.”***

L.G., Principal  
Garcia Maldonado Inc.  
Interior Design &  
Architecture

***“We found Hearth Cabinet™ Fireplaces to be the optimum choice for the design of the Yotel suites because of their user-friendly operation, flexibility in installation and compliance with the City of New York code.”***

I.L., Architect (AIA)  
Ismael Leyva Architects

***“Hearth Cabinet™ Ventless Fireplaces provide elegant and versatile designs,*** super easy installation with no ventilation headaches, no fuel connections to worry about, and are low maintenance and very safe for families. Not to mention the endless possibilities of custom design around each piece, whether for a stately focal point, a room divider, creating a small cozy corner, incorporating storage, shelving or seating: it will definitely set the mood for a great home atmosphere.”

I.B., Designer  
Cliff Young LTD.

***“The HearthCabinet™ Fireplace is a beautiful enhancement*** to the living room and creates a romantic ambience. Most of all, the fireplace is an unexpected feature for many visitors to the apartment who don’t realize that this is available for flueless installation and New York City fire code approved.”

E.D., Residential Client

***“The fireplace unit was beautiful*** and easy to install, everybody was happy with that choice.”
