

CHIC

No one ever says, "Fashion is a no-brainer." It just doesn't happen. And for spring 2013, that is most certainly still the case. You can't dress yourself in the dumbest-looking throwback '90s zig-zag patterns – like something out of *Do The Right Thing* – and think it's going to fly. A mixture of styles from the '80s, '90s and '00s are likely what's going to get you through the season stylishly. And as we all know, spring is about rebirth, so bold colors and a variety of patterns (both for men and women) are important. Give yourself a little life – a little pep in your step – and take some risks. And don't forget, denim is wearable as a top or jacket, not just as your pants. So it would be foolish, per usual, to overlook some fun and flirty accessories and jackets (denim or not). Just remember, as a general rule, have fun and don't be afraid to mix and match. | **RDW**
