

INTUNE JUMPSTART (2-DAY)

THE GO-TO FIRM FOR:

Windows Migrations

Virtual Desktop

Infrastructure (VDI)

Cloud Strategy & Design

Data Center Services

IT Staffing

SYSTEM MANAGEMENT IN THE CLOUD

Windows Intune simplifies how businesses manage and secure their PCs with Windows Intune cloud services and Windows 7. With the Windows Intune cloud service, IT can remotely perform security and management tasks through an Internet connection, helping ensure that users anywhere are working with a well-managed PC. With upgrade rights to Windows 7 Enterprise and future versions of Windows included in the subscription, users can have the best Windows experience on the latest version of Windows, reducing management complexity.

HOW IT WORKS

The Windows Intune Jumpstart solution helps customers understand the ease of use and value of adopting Windows Intune to manage updates, endpoint protection, gather insight on hardware and software inventory, and remote assistance. Upon successful completion of the Jumpstart, participants will gain a clear understanding of the features and benefits of Windows Intune to enable them to move forward with a full implementation in their production environment.

IPM offers this proof of concept engagement for a typical duration of two (2) days. To maximize return on investment (ROI), the offering is implemented in conjunction with your resources (personnel and existing infrastructure) when possible. The engagement provides decision-making expertise based on technical considerations and an up-to-date Microsoft project roadmap, which considers your business and technical requirements.

SOLUTION BENEFITS

- Address the challenges in managing a highly mobile or distributed workforce
- Understand the business benefits of remotely managing and securing computers
- Understand the different roles admins can take to manage computers
- Centrally deliver applications, updates and patches centrally and ensure compliance
- Learn about the subscription model of licensing Windows Intune

To discuss the Windows Intune Jumpstart solution, contact your IPM representative directly, email Microsoft@ipm.com or call 800-476-1155.

DELIVERABLES

- Understand managing and securing of PCs with Windows Intune cloud service
- Understand the benefits and cost savings associated with the solution
- Setup and configure the Windows Intune agent to manage and secure individual PCs remotely.
- Provide a comprehensive overview of System Overview, Computers, Updates, Software and other key workspaces
- Set Alerts, Policies and Endpoint protection for individual or a group of computers
- Provide a comprehensive roadmap to roll out Windows Intune
