

Thing Auction

Welcome to the auction. We have over 120 items to auction in 50 minutes, so things are going to go quite quickly.

Auction Rounds

There will be three rounds, the Red round, the Blue round and the Green round. You will collect a thing from each round. The first round is things that were suggested by teams, the second round is the open round and the third round is the unseen round where the things are revealed during the auction.

Each team will get one, **and only one**, item from each round. If you don't bid for anything in a round you will get one of the "left-over" words from that round.

To help you plan your bidding strategy here the words for the first two rounds are on the end of this document. These words are given in the order they are going to be auctioned.

Bidding

You will have 15 seconds to bid for each thing. At the end of 15 seconds the team with the highest bid gets the thing. If an item is not purchased it will be allocated randomly to a team without a thing at the end of that round.

Money

You have been given some "Bank of Thingland" pounds that you can spend on things. If you spend all your money in the early rounds then you will be randomly allocated a thing at the end of the round. We will collect your cash and give you your thing as soon as you have bought it. If you can't pay for a thing it will go to the next lowest bidder.

In the final round you must bid all your money right at the start, there is no point in taking any cash away, right?

Have fun folks

Rob Miles
