

QUIBIDS TIPS ON THE QUICK

Created by David Di Franco, Jr.

Introduction

What is QuiBids?

QuiBids.com is the largest penny auction website that features over 8,000 winners each day. Needless to say, it's certainly one of the more active websites worth watching – and for good reason. Not only are you able to save a large amount of money on popular items, but it can also become very addicting.

With that said, it's important to remember that you are essentially gambling. No auction item is guaranteed yours, which means you need to bid with confidence and strategy. While I do have a YouTube [video](#) that covers seven tips, this eBook is meant to go beyond that.

Is QuiBids legit?

A quick Google search for this will return some questionable results. Do not let the naysayers fool you. Speaking from personal experience, I have won over 10 items in a matter of just a couple months. This includes two Xbox 360 bundles, both of which are brand new and worth \$300+ each.

In short, yes – QuiBids is legit. You just need to know what you're doing.
