DEFECTS FOUND

Listed below are defects that your VIA vehicle inspector has uncovered.
It is highly recommended that you present these findings to your mechanic for immediate rectification.

When is a safety inspection required?

A VIA Safety Inspection is a highly recommended regular inspection to ensure smooth day-to-day operation of major safety components of your vehicle

AGE OF VEHICLE

RECOMMENDED INSPECTION

Over 5 years

Every 6 months and/or prior to extended road-trips (family holidays etc.)

Under 5 years

Every 12 months and/or prior to extended road-trips (family holidays etc.)

ITEMS INSPECTED

Inside vehicle

- ✓ Spare wheel and jack (if equipped)
- ✓ Steering wheel
- ✓ Steering column
- ✓ Air bag system (if equipped)
- ✓ Brake, clutch, accelerator pedals operation and condition
- ✓ Brake booster operation
- ✓ Brake warning light
- ✓ ABS warning light (if equipped)
- ✓ Emergency/park brake operation and condition
- ✓ Gear selector operation and condition
- ✓ Seats and seat belts
- ✓ Driver controls
- ✓ Driver field of vision
- ✓ Windscreen wipers, demisters and washers
- ✓ Rear vision mirrors
- ✓ General interior condition
- ✓ General accessories condition and operation

- ✓ Ride height and clearance
- ✓ Lamps, signals and reflectors
- ✓ Exhaust outlet and emission
- ✓ Windows and windscreen
- ✓ Windscreen wiper arms and blades
- ✓ Doors, locks and hinges
- ✓ General damage and corrosion
- ✓ Bumper, bull and tow bars
- ✓ Fuel cap and filler

Road test

- ✓ Wheel balance and vibration
- ✓ Wander and bump steer
- ✓ Body roll and general suspension performance
- ✓ Brake directional stability
- ✓ Brake deceleration
- ✓ Park brake effectiveness
- ✓ Clutch, transmission and engine operation
- ✓ CV joint noise (if equipped)
- ✓ General noise and vibration
- ✓ Speedometer function
- ✓ Cruise control function (if equipped)

Underneath vehicle

- ✓ Tyres, wheels, studs and nuts
- ✓ Steering box, linkages and mounting
- ✓ Suspension
inc. struts, shocks, springs, stabilisers, control arms, bump stops
- ✓ Ball joints, load and location joints
- ✓ Brake assemblies
inc. discs, callipers, pipes, hoses, drums, cylinders and ABS components
- ✓ Exhaust and emission system
- ✓ General damage and corrosion
- ✓ Driveline
inc. drive shafts, CV joints and boots, slip and universal joints
- ✓ Transmission
- ✓ Fuel system
- ✓ General fluid leaks

Under bonnet

- ✓ Steering column
- ✓ Power steering
inc. belts, fluid, hoses and leaks
- ✓ Brake system
inc. booster, master cylinder, fluid condition and level, hoses and leaks
- ✓ Exhaust and emission system
- ✓ Windscreen washer reservoir and piping
- ✓ Exhaust and emission system
- ✓ General damage and corrosion
- ✓ Engine and transmission mounting
- ✓ Battery and electrical mounting and general condition

IMPORTANT INFORMATION REGARDING THIS VEHICLE SAFETY INSPECTION

This report describes the results of a Vehicle Inspections Australia (VIA) safety or certificate of roadworthiness inspection which is an examination of the above-listed vehicle, including limited road testing and visual inspection on the day of the examination as indicated in this report.

VIA will not be responsible for any defects which become apparent at a later stage or which can only be identified by dismantling any part of the vehicle (except where directed by VicRoads), provided we have acted with reasonable care and skill.

This report is supplied for the benefit of the customer named above. If the service is for the purpose of a business, the provisions of the Australian Consumer Law (ACL) do not apply, and our liability to the customer for whatever reason will be limited to the cost of the inspection only.

A VIA safety or certificate of roadworthiness inspection provides an objective, independent viewpoint on general safety items on the motor vehicle. The assessment is

based on a non-invasive external and operating inspection only and is valid at the time of the appraisal. The inspection will not identify any hidden defects, intermittent problems, problems that cannot be identified via a visual inspection or become evident after the inspection.

VIA has used all reasonable care and skill in completing its examination of the vehicle and in the preparation of this report. This is a limited inspection and VIA does not warrant the condition of the vehicle at the time of purchase.

The inspection report will not identify whether any of the systems or parts of the vehicle will continue to operate acceptably. For coverage of potential future repairs you may consider purchasing a mechanical warranty insurance policy.

VIA prepared this report for the customer named in this report and is under no obligation to supply information on the inspection or supply a copy of this report to any third party.

This inspection report excludes information on the value of the vehicle. However, information on the vehicle's value can be provided by purchasing a Red Book vehicle valuation certificate which can be arranged, for a small charge, on your behalf.

The information provided herein is accurate to the best knowledge of VIA at the time of the inspection and VIA disclaims all liability on behalf of itself, and its agents and contractors, to the extent permitted by law, for any error, omission, defect, failure and/or for any damages arising out of reliance upon this report.

This report is not a warranty or guarantee for any purpose. This inspection covers safety items only. For a mechanical inspection it is recommended you consider a pre-purchase inspection.
