Hi Nick.

I hope this finds you well.

The last three years have been amazing. In this time I have met a lot of exceptional people. I have found myself immersed within a strong community, amongst people with strong personalities. The people who I find myself most fond of and hold a lot of respect for are those who have given me the time of day, those who stopped to take a second out of their own busy lives and shared a level of consideration. You are one of those people.

The helpful insight you have been able to give me is priceless. You have shared with me fantastic 'out of the box' and somewhat radical ideas that can only be gained through years of professional experience. Acting on these ideas have proven most successful. Take the address of our premises for example. If we relied on out the address 27b/45 William Street nobody would be able to find us. The address 1 Paddy Troy Mall however is a very GPS user friendly title and sounds pretty amazing. When you're tucked inside a mall you need as much aid in being found as possible!

I would like to thank you for this.

It will be interesting to see what the coming years hold for Paddy Troy Mall. There is a lot excitement about the potential for this hidden gem. I can see a thriving tight-knit retail community, enhanced by a lane of well-established trees, aesthetically pleasing architecture and an eclectic mix of devoted retailers. With you around I can see things heading in the right direction.

Thankyou for your all your help, I look forward to seeing our beautiful city evolve.

Captain Walker
