Rustic Fireplace Mantels

RECLAIMED WOOD – VIRGIN TIMBER FROM AGED STRUCTURES.

Our rustic fireplace mantels are made from antique hand-hewn or rough sawn beams and add a historically inspiring, natural element to any modern or rustic interior.

The allure of each beam is perfectly preserved as the marks from the rustic process that shaped it are left perfectly intact – whether it's the rough touches of an old world saw mill or the scars from the axe of a frontier craftsman.

NATURALLY-AGED, HAND-SELECTED AND BEAUTIFULLY FINISHED.

These premium fireplace mantels are hand-graded and meticulously selected to match your precise design preferences. Every fireplace mantel will be custom-cut to your specified length, surface de-nailed, treated for insects, pressure washed, and kiln dried to ensure stability and longevity of beauty.

Our large inventory allows you to select the perfect mantel by choosing which surface type you prefer, with options including: boldness of character, smoothness of sides, and the presence of unique visual features. While usually shipped as raw pieces, we also offer a wax finish if a softer look is preferred.

FIREPLACE MANTEL SPECS:

Our reclaimed mantels are 100% virgin timber beams taken from old wooden structures such as barns and factory buildings.

FACE WIDTHS	faces up to 12" x 12". call for in-stock or to custom order
LENGTHS	custom cut
FEATURES	- smooth surface milled - orig., virgin-timber grain - mortise/notch features - nail holes, axe marks, etc.
FINISH OPTIONS	- unfinished/pre-finished (see color swatches)
FSC STATUS	100% Recycled*

GENERAL BEAM/TIMBER INFO:

Fireplace Mantel Ordering: We keep a small quantity of pre-made fireplace mantels in our showroom, call for availability. All other orders are custom made with beam type, size, length and finish built to customer specifications.

Length & Width Variance: It is necessary for us to include material overage to ensure the desired length is shipped. When this happens, the extra material will be shipped in-tact and charged accordingly.

Kiln Drying: We are able to kiln dry timbers up to 20' in length.

Please Note: Beams are priced by linear foot (LF) as mixed-hardwood specie orders. Please call for single-specie beam orders.

* FSC certification available upon request.

NOTE: Each of our flooring products possess unique characteristics and beauty. While our samples provide a close representation of each specie, they are for photo reference only and cannot exactly match the end product.
